(a)
error on learned paths / on the teacher law
h=0, 1k steps
h=0, 30k steps
h=0, 200k steps
h=0.1, 1k steps
h=0.1, 30k steps
h=0.1, 200k steps
$\propto (1-t)^{-2}$
$K(t) = m(t)/r(t)$
$1 - t$
(b)
what the loss certifies against the endpoint
measured $\|Z_T - Y_T\|_{L^2}$
loss-only bound B_T with $K \equiv 1$
at $T = 1 - 10^{-3}$, $h = 0$
training step
